

# HORTICULTURE

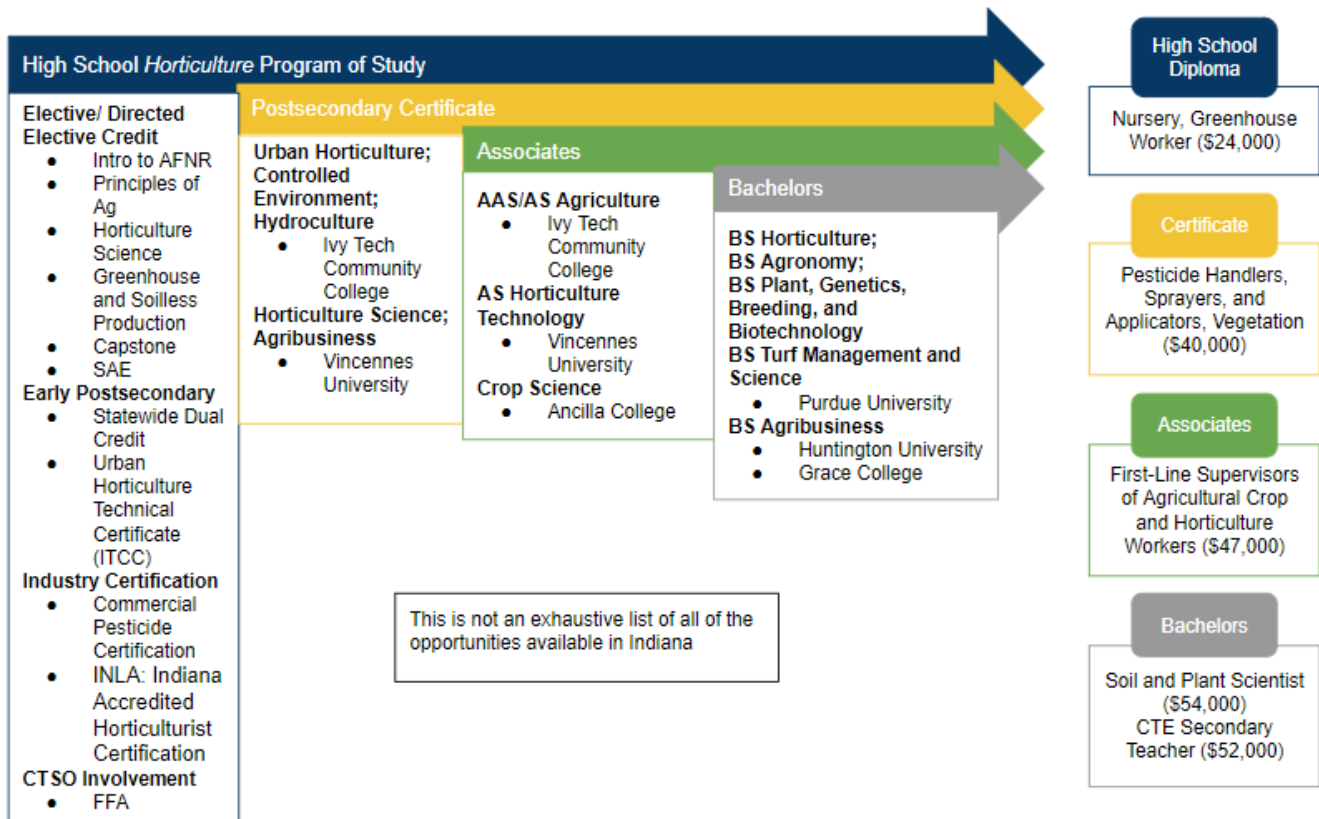

## Agriculture, Food, and Natural Resources

<sup>1</sup> Satisfies a Core40 Science requirement. <sup>2</sup>Statewide dual credit

### ABOUT THE PROGRAM OF STUDY

*Horticulture* is a broad and diverse program of study ranging from improving human environment to producing fruits and vegetables to floral design. Upon completion of this program of study, proficient students will be prepared for careers in the management of greenhouse operations, horticulture production or further study in the horticultural, or plant sciences. This program of study will allow students to obtain dual credits with postsecondary institutions, earn the status as a CTE Concentrator, complete a postsecondary certificate, and industry certifications.

Students in this program of study will be eligible to join FFA. In addition to school events, students will be able to compete at the district, state, and national levels. Through FFA, students not only learn about agriculture, but also professionalism, leadership, and soft skills. Walk away from your high school career with experience in competing, networking, applying course content, and more! See your agriculture
