

LANDSCAPE MANAGEMENT

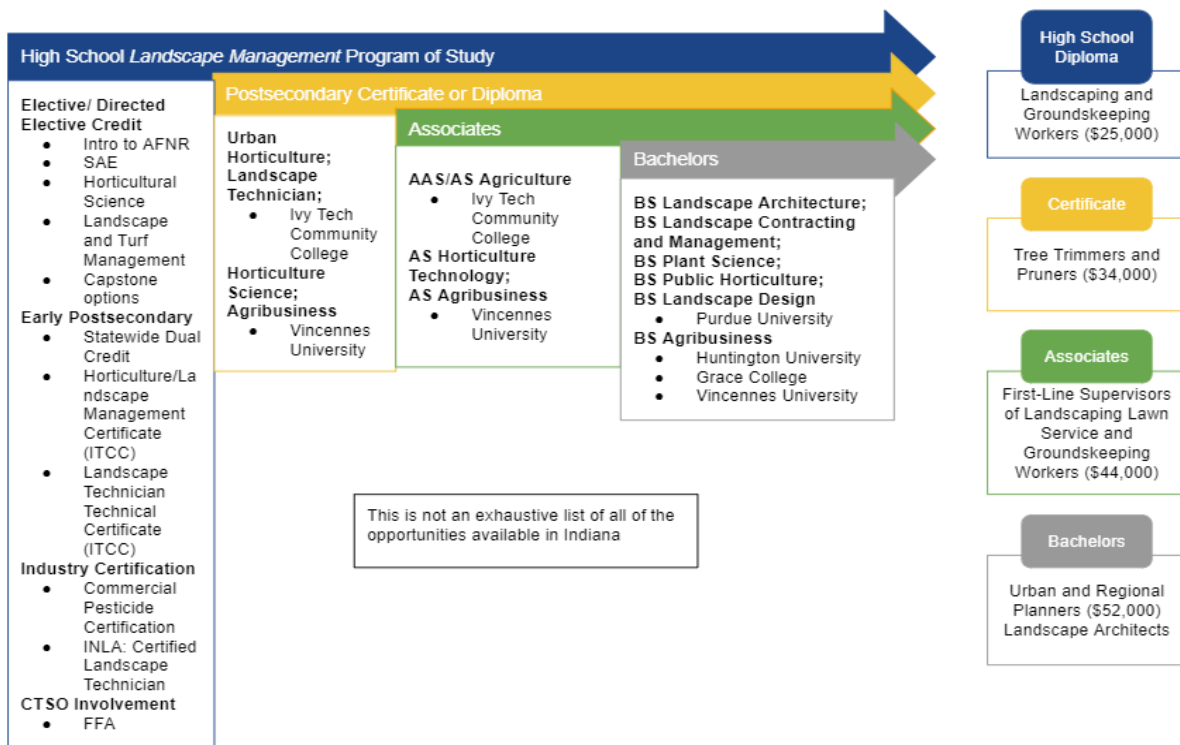

Agriculture, Food, and Natural Resources

¹ Satisfies a Core40 Science requirement. ²Statewide dual credit

ABOUT THE PROGRAM OF STUDY

Landscape Management is a broad and diverse program of study ranging from improving human environment to plant maintenance to managing of recreational and sports turf. Students learn the procedures used in the planning and design of a landscape using current technology practices, the principles and procedures involved with landscape construction, the determination of maintenance schedules, communications, and management skills necessary in landscaping operations, and the care and use of equipment utilized by landscapers. This program of study will all students to obtain dual credits with postsecondary institutions, earn the status as a CTE Concentrator, complete a postsecondary certificate, and industry certifications.

Students in this program of study will be eligible to join FFA. In addition to school events, students will be able to compete at the district, state, and national levels. Through FFA, students not only learn about agriculture, but also professionalism, leadership, and soft skills. Walk away from your high school career with experience in competing, networking, applying course content, and more! See your agriculture
